

PCB Design and Manufacturing

Convert your brilliant ideas into schematics, then products!

Engineering

- Circuit Design & PCB
- Layout
- DFM Services
- Material selection
- Prototype Development
- Production incubation

We are equipped for both medium to low volume production.

We can turn around prototypes very quickly.

PCB Assembly

- SMT
- Double sided PCBs up to 18" x 17" (455mm x 430mm)
- Fine pitch components to 0201, QFN, BGA & LGA
- High density component placement with 100% vision.
- Through-Hole-High layer count with multiple planes utilizing selective wave solder
- Lead Free (RoHs) or leaded
- No-Clean or Aqueous cleaning
- ESD compliant facility
- X-ray and optical inspection

Product Assembly

- Modules
- Systems

Testing

- Memory testing utilizing Triad & CST Memory tester
- Functional testing with customer supplied equipment and procedures
- Database tracking and reporting

Materials Management

- Full consignment
- Full turnkey
- Hybrid of consignment & Turnkey
- Procurement & warehousing

TECHNOLOGIES

ZERO DEFECTS

IS OUR MOTTO
